Nursing Areas

Area	Description
Medical/Surgical	Cares for patients that are acutely ill with a wide variety of medical issues or are recovering from surgery.
Critical Care	A specialized nurse that deals with life threatening problems. (Emerg, ICU, NICU)
Maternity	Provides care for expectant mothers before, during and after childbirth.
Operating Room	Provide care and support to patients before, during and after surgery. OR Nurses also assist the surgeon and the surgical team in their tasks.
Primary Care	Works on a team of Primary Care professionals to provide a range of healthcare services with the goal of continuity of care across multiple healthcare settings.
Residential Care	Provide residential care for elderly or disabled people that often includes around-the-clock nursing care.

Primary Care

- Person-centred medical care setting, such as a family doctor's office, where people establish a long-term relationship with a doctor or nurse practitioner who provides and directs their medical care.
- Primary Care teams consist of a variety of health care professionals who work with your doctor or nurse practitioner to support total patient care
