

Kitsumkalum Garden staff and 'Na Aksa Gyilak'yoo School will be working together with Terrace Food Association, Ksan, and K5t to bring a Horticulture (the science and art of the development, sustainable production, marketing and use of high-value, intensively cultivated food and ornamental plants) program to the village. The school will need living space for the student to cultivate their garden skills. We are looking for community members within Kitsumkalum who would like their yards be upgraded with either; Garden Boxes, Micro Farms, or Pollinator Field. Working the garden will be voluntary for homeowners. Kitsumkalum staff and students can maintain, cultivate and harvest the produce.

Please deliver your vote to the Medical Center or Band Office by 13:00 on April 11th . We will use these stats to purchase the necessary wood, soil and seeds.
