

Notice: Community Plan (2026.4.24)

Ama sah, Kitsumkalum,

We are currently working with **Frontera Forest Solutions Inc.** to develop a Community Wildfire Resiliency Plan (CWRP) for Kitsumkalum.

CWRPs are designed to help communities reduce wildfire risk and improve preparedness. These plans assess local wildfire hazards, identify critical values at risk, and outline practical actions to mitigate potential threats. By bringing together community members, government agencies, and other stakeholders, this work plays an important role in protecting lives, property, and natural resources.

Frontera will be on-site in Kitsumkalum from **May 12 to May 14** to conduct field work and complete assessments throughout the community.

We would like to share this information with the community ahead of time, so residents are aware of the work taking place. This may include site visits, general observations, and data collection in and around the area.

Questions or concerns:

- Questions about Frontera Forest Solutions Inc. – **250-615-8094**
- Concerns with assessments and surveying taking place in Kitsumkalum – **778-702-1200**
